

AMPLIFY

Elevating JD Edwards and Beyond

A collaborative program to help organizations running JD Edwards boost agility and resilience with the help of Oracle Cloud Applications.

Seamless Integration of Oracle Fusion Cloud Applications for Oracle JD Edwards with Amplify

"I want the business to be able to take advantage of the latest cloud applications available to stay ahead of the competition, but a complete migration is not in the cards in the near term"

JD Edwards is at the center of your business universe, when integrating new applications, you want to ensure that your core is not disrupted. The Amplify platform is designed to ultimately reduce the challenges that are typically associated with integrations to your JD Edwards enterprise.

THE AMPLIFY PLATFORM PROVIDES PRE-BUILT INTEGRATION FOR:

- Supply Planning
- Demand Planning
- Enterprise Performance Management
- Product Data Hub
- Product Lifecycle Management

KEEP YOUR EDGE

Terillium is an Oracle Platinum Partner and Cloud Excellence Implementer, certified in both JD Edwards and ERP Cloud. Our team's extensive Oracle ERP knowledge, across products, positioned us to develop the Amplify program.

We enable our clients to implement new applications and integrations to your JD Edwards enterprise with:

- ▶ In-depth knowledge of both JD Edwards and ERP Cloud
- ▶ Effective software footprint mapping and planning
- ▶ Proven project methodology
- ▶ Functional and technical translation between JDE and the Cloud

AMPLIFY

Elevating JD Edwards and Beyond

What is the Amplify Platform?

When it comes to introducing new applications and integrations, there is rarely a one size fits all solution. The Amplify program from Terillium is a low risk, fully formed hybrid implementation platform includes both technical and application thought leadership based on many years of working across both JD Edwards and Oracle Fusion Application stacks.

The Amplify platform is designed for the implementation, automation, and management of complex integrations across your application landscape with your cloud-to-on-premise applications; bringing the culmination of Terillium's 28 years of business and a deep knowledge of each side of the Oracle equation.

SUCCESSFUL AMPLIFY PLATFORM IMPLEMENTATION BY INDUSTRY

Terillium's resources and expertise of both Oracle JDE and Oracle Fusion Cloud are recognized in process, knowledge, and business benefits. Terillium also factors in your industry challenges and needs to cultivate the best implementation plan for your hybrid system.

Since 2018, the Amplify platform has been successfully deployed in these industries:

- Manufacturing
- Distribution
- Life Sciences
- Project Based Industries
- Construction

A PROVEN PROJECT METHODOLOGY

Our team is Oracle certified across the JD Edwards and Fusion Application stacks making us uniquely qualified to support both platforms and the integration points. Our methodology incorporates comprehensive training, to ensure end users are educated and ready for the transition.

END USER TRAINING AND ONGOING SUPPORT

Terillium has dedicated managed services for training, optimization, ongoing support and other initiatives. Our team supports over 100 customers with 100% renewal rates over the last 3 years.

ABOUT TERILLIUM

- ▶ Celebrating 28 years as an ERP consulting partner
- ▶ Recipient of 16 Oracle Excellence Awards
- ▶ One of the largest JD Edwards consulting partners in the United States
- ▶ Oracle Cloud Excellence Implementer status for ERP
- ▶ Certified in Oracle Unified Methodology for cloud
- ▶ Extensive industry experience working with over 700 organizations across the country

“We selected Terillium for our Oracle cloud migration because they have been our partner with JDE for a number of years and we trust them. They are a top-notch team of folks who really do put the customer first.”

Brian Killen
Director of IT, Eco-Energy
